

Canadian Red Cross Training Partners to Receive Exclusive ePACT Benefits

Red Cross continually looks for benefits and resources to help enhance operations, safety and support capabilities for our training partners. As part of that commitment, we are excited to announce a partnership with [ePACT](#), a secure online emergency network used by families and community organizations across North America.

For organizations, like aquatic and recreation centres, daycares, camps, sports, schools, and others, ePACT replaces millions of paper forms used each year. By securely connecting organizations to families, ePACT streamlines data management of critical emergency and medical information, special needs and accommodations, consents and waivers, while providing reporting, communications and other support features for day-to-day operations and emergency response needs.

We are thrilled to offer our training partners **exclusive ePACT discounts and resources**, including our upcoming webinar: [Demonstrating Your Commitment to Safety](#)

- **Topic:** Best practices and examples of processes supporting the safety and wellbeing of program participants day-to-day and in the event of an emergency
- **Time:** Wednesday, September 19, 2018 - 11:00am to 11:30am MST

Visit our [sign-up page](#) if you're interested in attending this webinar, or receiving access to a recording in future. Or for more information on our partnership, discounts and other resources, contact your Red Cross Account Manager, or [visit our website](#).

"Switching to ePACT from paper forms has been great! It provides convenience for our customers – they only have to fill out ePACT once and can update as needed when it works for them. Our leaders have faster access to data and can identify medical conditions quickly and easily. And having this all on mobile devices means less paperwork and improved security."

~ Lea Howard, District of West Vancouver Parks, Culture & Community Services
